Profile

Full stack developer with 2.5+ years building production software and 5+ years in digital products. At Virgu Technology I worked on FullBagERP (school management) and FullBagAccounting (cloud accounting) as one of the first developers, and built the FullBag transport app on my own. Now studying for an MSc in Computer Science at Sapienza University of Rome.

Part-time developer roles in Italy, up to 20 hours a week during my studies. Internships and working-student positions. Full-time roles after I graduate in 2028. No visa sponsorship needed for part-time work during my studies.

Experience

Full Stack Developer, Virgu Technology Mar 2026 – Oct 2026
Kathmandu (remote)

- One of the first developers hired, working on FullBagERP (school management) and FullBagAccounting (cloud accounting) from their early versions as the team grew to about 15 people.
- In FullBagERP I built the transport module (routes, stops, student assignment, live vehicle tracking and the parents' view), the online admission form, curriculum and unit planning, staff management, role-based permissions and dashboards.
- In FullBagAccounting I built master data, Nepal Rastra Bank exchange rates, voucher numbering by Nepali financial year, and the Cash/Bank, Journal and Debit/Credit Note screens.
- Built the FullBag transport app alone in React Native: live vehicle location for school admins and parents, an offline queue so no position is lost when signal drops, and QR code student attendance.
- Worked on the products' infrastructure: PostgreSQL, Redis, Docker, and CI/CD with GitHub Actions.
- Built the company website, virgutech.com.

Full Stack Developer, W.A.S. Media Marketing Oct 2024 – Feb 2026
Kathmandu

- Built and deployed websites and web applications for the agency's clients, with primary sites hosted on Hostinger and AWS used for specific services.
- Built and optimised the FBH Nepal exhibition website, which reached the top Google result in Nepal for searches like “food and beverage exhibition in Nepal” and “upcoming exhibition”.
- Built REST APIs and MERN-stack applications for client projects.

Web Developer, House of Rajkarnicar Mar 2024 – Oct 2024
Kathmandu

- Built and maintained event and brand websites, including social media integrations.
- Improved search visibility with technical SEO.

Before that: digital products and marketing 2021 – 2024
Product Head / Digital Marketer, Socheko.com (Jul 2021 – Oct 2023); Digital Marketer & E-commerce Officer, MastaKala.com (Dec 2023 – Mar 2024).

Products

FullBagERP (full stack developer, on the team from the beginning). School management software for private schools, colleges and school groups: admissions, attendance, academics, exams, fees, transport, staff, library and a parent app, in one system. Case study

FullBagAccounting (full stack developer, on the team from the beginning). Cloud accounting for small businesses and the accounting firms that keep their books, from quotation and VAT invoice to balance sheet, in Nepali (Bikram Sambat) and English dates. Case study

FullBag transport app (sole developer). A React Native driver app that shares a school vehicle's live location with school admins and parents, and records student attendance by QR code. Case study

Personal projects: CollegeEase, a student hub built with Next.js, Express and MongoDB; ChurnIQ, churn prediction with XGBoost, SHAP and a Streamlit dashboard.

Websites: Pure Land Tours & Travels, OM Sounds, virgutech.com, and 11 more for businesses in Nepal and abroad.

Education

MSc in Computer Science - Informatica 2026 – 2028
Sapienza University of Rome. Laurea Magistrale, LM-18.

Taught in English.

BSc (Hons) Information Technology 2022 – 2025
Studied at Lord Buddha Education Foundation, Kathmandu. Awarded by Asia Pacific University of Technology & Innovation (APU), Malaysia.

Second Class Honours (First Division). CGPA 3.46 / 4.00, final semester GPA 3.90.

Relevant modules: Advanced Database Systems, Designing and Developing Applications on the Cloud, Cloud Infrastructure and Services, Distributed Computer Systems, Object-Oriented Development with Java, Web Applications, Programming for Data Analysis, Probability and Statistical Modelling, System and Network Administration, final-year IT Project.

Two industry internships completed as part of the degree.
AWS Certified Cloud Practitioner, 2025

Skills

Languages	TypeScript, JavaScript, Python, SQL
Frontend	React, Next.js, Vue.js, HTML, CSS, Tailwind CSS
Mobile	React Native, Expo, Leaflet maps, on-device SQLite
Backend	Node.js, Express, Prisma, Flask, REST APIs, BullMQ job queues
Databases	PostgreSQL, MongoDB, MySQL, Redis
Cloud and DevOps	AWS (EC2, S3), Docker, GitHub Actions, Git
Data and ML	pandas, NumPy, scikit-learn, XGBoost, LightGBM, SHAP, MLflow, Streamlit

Languages

Nepali	Native
Hindi	Fluent
English	C1 (IELTS Academic 7.0, January 2026)
Italian	Beginner, currently learning
